GUMMADI RAKESH

JAVA FULL STACK DEVELOPER

+91 8978053109
gummadi0312@gmail.com
HYDERABAD, TELANGANA.

SUMMARY

Java Developer with **2+ years of experience** in developing and maintaining Java-based applications using **Java, Spring Boot, Spring Data JPA, Hibernate, REST APIs, and MySQL**. Experienced in **Microservices, Apache Kafka, Spring Security, JUnit, Docker, Git, and Maven**. Worked on web and **mobile applications using React Native and Expo**, including API integration and mobile feature development. Familiar with **AI-assisted development and Vibe-Coding using Cursor AI**. Strong in debugging, problem-solving, clean code, and Agile development practices.

SKILLS & ABILITIES

- **Programming Languages:** Java
- **Frameworks:** Spring Boot, Spring Data JPA, Hibernate, Spring Security
- **Backend Technologies:** REST APIs, JSON, JDBC, Microservices, Open-Feign
- **Core Java:** OOP, Collections, Exception Handling, Multithreading, Lambda Expressions, Stream API
- **Database:** MySQL, SQL, Joins, CRUD Operations
- **Messaging:** Apache Kafka
- **Testing:** Postman
- **Version Control:** Git, GitHub
- **Build Tool:** Maven, Docker
- **Application Server:** Apache Tomcat
- **Mobile&Frontend:** React Native, Expo, React.js, AI-Assisted Development, Cursor AI, Vibe Coding
- **Development Tools:** IntelliJ IDEA, Eclipse, Spring Tool Suite, VS Code
- **Methodologies:** Agile, Scrum
- **Other Skills:** Debugging, Code Reviews, Problem Solving, Docker, Clean Code, SOLID Principles, Design Patterns

EXPERIENCE

Software Engineer | Hyderabad, Telangana AJA

Consultant Services LLP.

Designed, developed, and maintained **Java-based applications** following best coding practices
Implemented **OOP principles** to create modular, reusable, and maintainable code

Developed server-side components using **Servlets and JSP** to handle requests and build dynamic content

Worked extensively with **Hibernate ORM** for entity mapping, table relationships, HQL queries, and transaction handling

Developed and optimized database interactions using **JDBC** and **MySQL**

Used **Maven** for project build and dependency management, and **Git** for version control

Deployed and tested applications on the **Apache Tomcat** server.

PROJECTS

Project -1 Dosha Nivaran (Vendor Partner Network - VPN)

Role: Java Developer

Technologies: Java, Spring Boot, Spring Data JPA, Hibernate, Spring Security, REST APIs, MySQL, Maven, Git, React.js, Cursor AI, Antigravity.

Project Description.

Dosha Nivaran (Vendor Partner Network - VPN) is an internal platform used to onboard, verify, and manage vendors for the Dosha Nivaan application. It supports vendor registration, document verification, role-based access for Individual and Corporate users, and service management before vendors go live.

Roles & Responsibilities:

- Developed backend services using Java, Spring Boot, Spring Data JPA, and Hibernate.
- Designed and implemented REST APIs for vendor registration, profile management, authentication, and verification workflows.
- Developed role-based access control (RBAC) for Individual and Corporate vendor accounts.
- Implemented Controller, Service, Repository, DTO, and Entity layers following a layered architecture.
- Designed and managed MySQL database operations using Hibernate and Spring Data JPA.
- Implemented input validation, exception handling, and secure authentication.
- Performed API testing using Postman and resolved backend issues through debugging.
- Used Maven for dependency management and Git for source code version control.
- Collaborated with cross-functional teams in an Agile development environment.
- Developed and enhanced the frontend using React.js with AI-assisted development tools such as **Cursor AI** and **Antigravity**, enabling faster UI development and seamless backend API integration.

Project 2: Customer Relationship Management (CRM)

Role: Java Developer

Technologies

Java, Spring Boot, Spring Data JPA, Hibernate, Spring Security, REST APIs, Microservices, Kafka, OpenFeign, MySQL, JUnit, Maven, Git, Docker, React Native, Expo

Project Description

CRM is an enterprise web-based application designed to manage customers, users, and business operations. The application provides secure authentication, role-based access, customer management, and an Audit Service that records user activities to improve system monitoring, security, and compliance.

Roles&Responsibilities

- Developed REST APIs using **Java and Spring Boot**.
- Implemented **Audit Service** to track user activities and application events.
- Built **Controller, Service, Repository, DTO, and Entity** layers.
- Used **Hibernate, Spring Data JPA, and MySQL** for database operations.
- Implemented input validation and exception handling.
- Tested REST APIs using **Postman** and performed backend debugging.
- Worked with **Microservices, Open-Feign, and Apache Kafka** for service communication and eventdriven processing.
- Used **Git and Maven** for version control and project build management.
- Worked in an **Agile/Scrum** development environment.
- Worked on the **CRM mobile application using React Native and Expo**.
- Implemented mobile features based on existing web application functionality.
- Integrated mobile screens with existing **REST APIs**.
- Worked on **login, dashboard, modules, forms, validation, API integration, and mobile navigation**.
- Used **Cursor AI and AI-assisted/Vibe Coding** to accelerate mobile application development.
- Maintained consistent functionality between the web and mobile applications.
- Debugged and resolved **mobile application and API integration issues**.

EDUCATION

Bachelor of Technology (B. Tech) – Computer Science.
Jawaharlal Nehru Technological University, Hyderabad (JNTUH).
Aurora's Scientific Technological Institute

PROFESSIONAL STRENGTHS

- Strong problem-solving and thinking skills
- Ability to understand business requirements and convert them into technical solutions
- Quick learner with a solid foundation in Java.
- Effective collaboration within development teams

KEY CONTRIBUTIONS

- Contributed to the successful development and enhancement of Java application modules
- Improved code quality by following clean coding standards and best practices
- Assisted in resolving production and application-level issues within deadlines

DECLARATION

I hereby declare that the above information is true and correct to the best of my knowledge.
